EXPERIENCIE

ENCOM S.A. – HEAD OF DEVELOPMENT
July 2023 – Present | Head of Development since Feb. 2025

I lead the Development Department, being responsible for the maintenance, continuous improvement, and development of new features for the company's SaaS platform in production, designed for small and medium-sized businesses. The system includes an administrative panel, point-of-sale solutions (web and mobile app), payment integrations, electronic invoicing (Paraguay), and e-commerce capabilities. I oversee the team's technical leadership, architectural design, and ensure system quality, performance, and scalability. In addition, I develop and maintain FACSIS, a production-grade electronic invoicing application aimed at mass adoption in Paraguay, built as a Web App using Next.js, TypeScript, and PostgreSQL, and compiled with Capacitor.
Technologies: PHP, Laravel, Java, Spring Boot, JavaScript, Node.js, Jetstream, MySQL, PostgreSQL, Next.js, TypeScript, CSS, SASS, Tailwind, Bootstrap, HTML5, Git, GitHub, Capacitor.
Web: https://encom.lat https://facsis.com.py
