PROFESSIONAL PROFILE

Technology leader with 10 years of professional experience: four in administration, accounting and sales, and more than six in software development. Since 2025 I have been responsible for the Development Department at Encom S.A., where I lead the evolution of a business-management SaaS platform in production (administration, web and mobile points of sale, SIFEN electronic invoicing, payment methods and e-commerce) used by small and medium-sized businesses in Paraguay.

I combine a degree in Accounting and experience in administrative and commercial areas with a solid systems background, which lets me turn business needs into technology solutions that streamline processes and support decision-making. I lead technical teams, define architecture and infrastructure (Docker, Kubernetes, cloud), drive the adoption of artificial intelligence in development and in products, and design management reporting and KPIs (BI) for the different areas of the organization.

KEY COMPETENCIES

Leadership and management	Leading development teams, planning and prioritization, agile methodologies (Scrum), defining team and product KPIs, working with business areas and clients; previous experience as head of sales.
Management systems	Design and implementation of ERP/SaaS-type management systems: administration, sales and POS, inventory, electronic invoicing (SIFEN), payment methods, e-commerce; system integration via API and middleware; process automation.
Data, BI and AI	Management and audit reporting and dashboards with Metabase; KPI design; integration of large language models (LLM) into products; adoption of AI assistants (Claude Code, GitHub Copilot) in the development cycle.
Infrastructure and security	Docker, Kubernetes (OVH), DigitalOcean and OVH servers; deployment and operation of production environments; backup, monitoring, access-control and certificate policies.
Quality and processes	TDD/BDD, code review, version control (Git/GitHub/GitLab), CI, issue tracking and continuous improvement.
Technologies	Java / Spring Boot, PHP / Laravel, Node.js, TypeScript, Next.js / React, Vue / Nuxt, Angular, MySQL, PostgreSQL, Capacitor (mobile apps), Tailwind, Docker, Kubernetes, Metabase.

TECHNOLOGY EXPERIENCE

Head of the Development Department · Encom S.A.

Feb. 2025 – Present

Senior Developer at the same company since Jul. 2023 · encom.lat · facsis.com.py

- **Leadership.** I lead the Development Department: planning, work assignment, technical leadership, code review and tracking of performance and quality indicators; coordination with the business areas and with clients.
- **Management system.** Responsible for the maintenance, continuous improvement and new features of the company's core system (multi-company SaaS for SMBs): administrative panel, web and mobile points of sale, payment integrations, electronic invoicing (SIFEN, Paraguay) and e-commerce.
- **Architecture.** Definition of the system architecture (multi-tenant, multi-currency) and of the quality, performance and scalability strategy; database optimization and definition of technical standards.
- **Infrastructure and security.** Administration of the production infrastructure on Docker and Kubernetes (OVH), DigitalOcean and OVH servers; backup, monitoring, access-management and certificate policies.
- **BI and indicators.** Design of management and audit reporting and dashboards with Metabase to support decision-making across areas; definition of operational and commercial KPIs.
- **Artificial intelligence.** Introduction of AI assistants into the team's workflow and development of features based on large language models within the company's products.
- **Product.** Development and maintenance of FACSIS, an electronic-invoicing application aimed at mass adoption in Paraguay (Next.js, TypeScript, PostgreSQL, compiled with Capacitor).

Technologies: PHP, Laravel, Java, Spring Boot, Node.js, TypeScript, Next.js, React, MySQL, PostgreSQL, Docker, Kubernetes, Capacitor, Metabase, Git/GitHub.

Software Engineer · Code100 S.A. *Jan. 2023 – Jun. 2023*

- Development and maintenance of digital-certificate systems and integration with external systems via API, database and middleware.

Technologies: Java, Spring Boot, Node.js, PHP, Laravel, PostgreSQL, MySQL, Git/GitLab.

Software Engineer · Biggie S.A. *Mar. 2022 – Dec. 2022*

- Development and maintenance of the e-commerce site (biggie.com.py), the internal administrative system and the company's call-center system.

Technologies: Nuxt.js, Vue.js, Angular, TypeScript, PHP, Laravel, MySQL, Vuetify, Tailwind, Git/Bitbucket.

Freelance Web Developer · Tecnofans Py *Mar. 2020 – Mar. 2022*

- Custom websites and web systems for small businesses, from requirements gathering to production release.

Technologies: Node.js, Java, Vue.js, PHP, MySQL, PostgreSQL, Bootstrap, Git/GitHub.

ADMINISTRATION, ACCOUNTING AND SALES EXPERIENCE

Four years in accounting, treasury, payments, invoicing and commercial management, in companies from different industries and in an accounting firm. That experience is the basis for understanding the business processes that I now turn into software.

Head of Sales / Commercial Manager · Estudio Contable El Búho Py (accounting firm) *Oct. 2018 – Oct. 2020*

- Responsible for the firm's commercial area: handling tax enquiries, receiving and visiting prospective clients, negotiating and financing services, and following up on the client portfolio.

Administrative Assistant, Payables · Durandal S.A. (Grupo Timbo) *Apr. 2018 – Sept. 2018*

- In charge of petty cash and supplier payments: invoice entry, payment and control of travel-expense reports, supplier service at the cash desk and bank reconciliations.

Accounting Assistant · Motormarket S.A. *Mar. 2017 – Mar. 2018*

- Supplier invoice entry, issuing invoices and credit notes, customer collections and central cash desk, supplier payments, bank transfers and reconciliations.

Accounting Assistant, Payables · Hola Paraguay S.A. (VOX) *Apr. 2016 – Feb. 2017*

- Invoice entry in the accounting system, journal entries for loans, guarantees and payroll, interest accrual, bank and fund reconciliations.

EDUCATION

Bachelor's degree in Accounting (degree awarded) · Universidad de Desarrollo Sustentable (UDS) *2016 – 2020*

Bachelor's degree in Systems Analysis (not completed) · Universidad de Desarrollo Sustentable (UDS) *2020 – 2023*

Technical High School Diploma in Accounting · Centro de Educación Integral de Luque (C.E.I.L.)

Ongoing self-directed training in software architecture, cloud infrastructure and applied artificial intelligence.
